And Increase Weight

A Physician's Advice

A Physician's Advice

Most thin people eat from four to six pounds of good solid fat-making food every day, and still do not increase in weight one ounce, while on the other hand many of the plump, chanky folks eat very lightly and keep gaining all the time. It's all boah to ear that this is the nature of the individual. It isn't Natures way at all.

Thin folks stay thin because their powers of assimilation are defective. They absorb just enough or me tood they eat to maintain life and a semi-blance of health and strength. Stuffing won't help them. A dozen meals a day won't make them gain a single "stay there" pound. All the fat-producing elements of their food just stay in the intestines until they pass from the body as waste. What such people need is something that will prepare these falty food elements so that their blood can absorb them and deposit them all about the body—something, too, that will multiply their red blood corpusaies and increase their blood's carrying power.

For such a condition I always recommend eating a Sargol tablet with every meal. Sargol is not, as some ceiteve, a patented drug, but is a scientific combination of six of the most effective and a single tablet eaten with each meal often has the effect of increasing the weight of a thin man or woman from three to five pounds a week. Sargol is sold by Lee & Osgood Co, and other good druggists everywhere on a positive guarantee of weight increase or money back.

Discouraged By Drink Habit

HANDS BAD WITH SALT RHEUM

Small Water Pimples on Fingers. Itched and Burned. Painful and Sore Cracks. Cuticura Soap and Ointment Cured in a Month.

Brooklin, Me.—"A few years ago my hands were very badly afflicted with salt rheum. At first there was an eruption of small water pimples on the finde of the flagers, and by not paying any attention to the hunder was hands are dually become the humor my hands gradually became worse and began to itch and burn and one after another cracks appeared around the nails, on the inside of the fingers and on the bend of the joints until I was discouraged, as they were very painful and sore. I had to emit work that required putting ray hands in water and could hardly work at

"I finally procured some Cuticura Soap and Ointment, and I found by washing my hands in quite warm water and Cuticura Soap that they were improving. I began wrapping my fingers nightly in pieces of soft linen, after a good application of Cuti-cura Ointment which was very soothing. In a month my hands were completely cured and I have never been afflicted with the trouble since." (Signed) Mrs. C. L. Parker, Nov. 22, 1912.

An Insect Which Ests Smoke. In a recent informal discussion of smelting and its troubles, an expert spoke of the "sulphur bag," an insect which according to his statements, thrives only in supertropical temperatures with plenty of sulphur smoke, and has a remarkable knack of getting on the back of the smeller's nuck when both his hands are occupied. Another smelter said he had noted them in California, where they had annoyed the Shasta County op-erators, but had not been known else-where in the state until Shasta coun-
